Paper 3: The economic environment and business

You must have:
Insert (enclosed)

Total Marks

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Answer the questions in the spaces provided
– *there may be more space than you need.*

Information

- The total mark for this paper is 100.
- The marks for **each** question are shown in brackets
– *use this as a guide as to how much time to spend on each question.*
- Calculators may be used.

Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.

Extract B**Skills shortages harming UK business, employers warn in 2018**

Britain's employers have warned that severe skills shortages are holding back the economy. The latest official figures showed the biggest fall in the number of workers from Eastern Europe since modern records began.

The British Chambers of Commerce (BCC) and the Federation of Small Businesses (FSB) urged the government to deliver a post-Brexit migration system to meet their needs amid signs that the fall in unemployment in recent years was putting upward pressure on wages. 5

Suren Thiru, head of economics at the BCC said: "There is clear evidence of a deep-rooted skills gap across the UK which is harming business growth."

In its latest update on the state of the labour market, the Office for National Statistics revealed that during 2018, the number of workers in the UK from former Soviet bloc countries had fallen by 154,000 to 881,000. 10

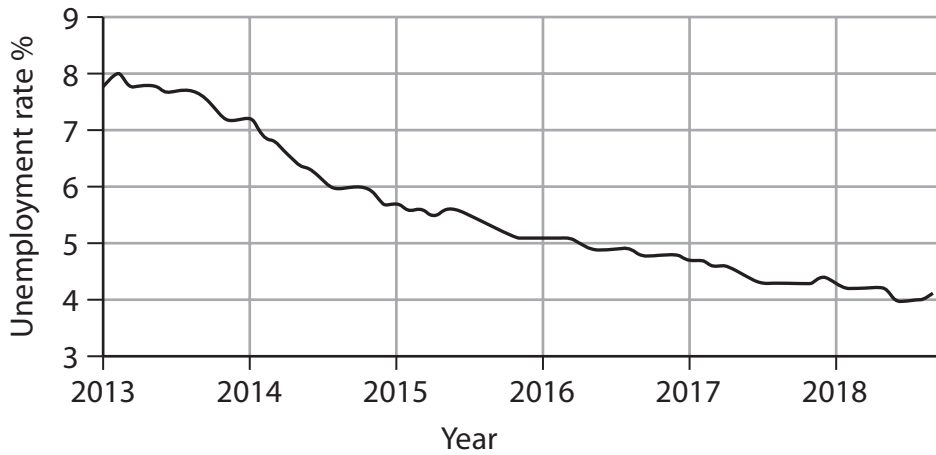

The additional 132,000 fall in the number of workers from the EU as a whole was also unprecedented. Employment from the rest of the world grew by 34,000.

Extract E

Bank of England raises alarm over surge in high-risk lending

The Bank of England has issued a stark warning over the rapid growth in high-risk lending to indebted companies around the world. It draws parallels with the US sub-prime mortgage market that triggered the 2008 financial crisis. The US market for such loans has more than doubled since 2010 to surpass \$1tn (£763bn). Though far from the scale of the US market, the total of high-risk loans to UK companies reached a record £38bn in 2017, while a further £30bn has been issued so far this year.

5

The rapid growth in high-risk lending comes as investors search for higher returns as a result of rock-bottom interest rates and billions of pounds of quantitative easing from central banks, used to stimulate their economies during the great recession that followed the 2008 financial crisis.

10

The Bank’s financial policy committee (FPC) noted that lending standards were falling and that it would more closely monitor the risks to Britain.

Philip Hammond hands Bank of England new powers

The Bank of England will be allowed to provide more than £500bn in lending to the economy without seeking the Treasury’s permission, in a move that reinforces the strength of the UK financial system.

15

Philip Hammond, the chancellor, said the changes would help to improve the resilience of the central bank. It would also help with its “ability to meet its monetary and financial policy objectives in the future”, he said.

The move also gives the Bank of England greater autonomy in lowering interest rates to zero and providing more money to commercial banks during times of need, without requiring Treasury permission.

20

Extract G

Inside Walkers – the biggest crisp factory in the world

Walkers, a subsidiary of *Pepsico*, is the most popular crisp manufacturer in the United Kingdom. It makes different varieties of potato and maize-based snacks, selling about 60 million bags every week. *Walkers* produces over 120 different products with new products being developed regularly, such as the six new flavours launched in 2018 to celebrate its 70th anniversary.

5

The firm has six manufacturing sites around the UK, employing 4,000 people. The biggest plant is in Leicester, where 1,100 people work in two enormous factories and a huge, fully-automated warehouse where enough crisps are stored to sustain a small country.

Extract I**Competitiveness of food and drink manufacturers hindered by rising costs**

The Food and Drink Federation (FDF) recently published a survey, which reveals that more than three quarters of manufacturers expect input prices to continue to rise throughout 2018. Increased ingredient costs and exchange rate volatility remain a concern for food and drink businesses over 2018.

More than half of those polled had cited increased ingredient costs, increased packaging costs and increased energy costs as having the biggest impact on their businesses.

5

Despite this, respondents felt general business confidence had remained static during the first half of 2018. Looking to the second half of the year, many companies said they were still hoping to invest, with investment in new machinery and product launches.

(Source: adapted from <https://www.newfoodmagazine.com/news/72673/competitiveness-of-food-and-drink-manufacturers-hindered-by-rising-costs-says-fdf-survey/>)

Extract J

Currency risk

Prior to the Brexit referendum in 2016, sterling was trading at €1.30. In the first half of 2018, the average rate has been about £1 to €1.12, close to post-2008 crisis lows.

Weak sterling is a major concern for Irish companies exporting their goods and services to the UK, including Northern Ireland. The total value of Irish goods destined for the UK in 2017 was €14bn (or 11.5% of total exports). The UK remains Ireland's single largest trading partner for the agrifood sector, which exported €5.2bn worth of goods to Britain last year. That leaves the sector highly exposed to currency risk.

5

Sterling's depreciation has devastated the Irish mushroom industry, forcing many producers out of business. The casualties include *McDonald Mushrooms* in Tipperary, which reportedly lost an average of €11 000 a week from adverse currency movements.

10

In contrast, Irish importers have been enjoying a "Brexit boom" – evidenced in the construction and automotive industries – as spending on "bargain" imports from Britain has soared since 2017.

In response to sterling's weakness, Irish producer *Codd Mushrooms Ltd* plans to expand operations into the UK to take advantage of lower production costs. Similarly, *Kepak Group*, one of Ireland's largest meat processors, has acquired four production sites in Britain. These operational moves offset sterling costs and revenues thus mitigating currency exposure.
