Write your answers in the spaces provided.

Tesla is a public limited company based in California, USA. Its founder and main shareholder, Elon Musk, wanted to produce an electric car that is affordable to a large number of potential customers. This car is called the *Tesla* Model 3 (Figure 3).

Introduced in 2017, the basic version of the Model 3 was originally priced at \$50 000 and the company wanted to reduce this price to \$35 000 by 2019. However, this was difficult to achieve because *Tesla's* California factory suffered from low levels of productivity. These problems resulted in *Tesla* making a \$976 million loss in 2018.

Figure 3: *Tesla* Model 3 electric car

Following the introduction of tariffs on US imports by the Chinese government in 2018, *Tesla* decided to invest \$5 billion in the construction of a new car factory in Shanghai, China. This factory will use flow production. However, with only \$2.4 billion of available capital, *Tesla* needs to raise external finance to fund it.

In 2019, *Tesla* decided to close most of its showrooms to reduce costs. The company believes customers will be happy to purchase electric cars using e-commerce.

customer orders the next day, so long as the order is placed online before midnight. Automation has also given ASOS the ability to increase the range of clothes it can sell on its website.

Figure 5: ASOS's Instagram bio

However, the market for clothes in the UK is becoming increasingly competitive. Despite a significant growth in sales, ASOS's profits have fallen. This has caused the company's share price to fall. ASOS has responded by focusing on viral advertising. Its latest campaign is to get customers to use the hashtag #AsSeenOnMe (Figure 5) when they are showing off their latest ASOS outfit on social media. In return, ASOS gives customers the opportunity to be featured on the ASOS Instagram feed which has 7.1 million followers.
